DIONELLE P. ALINSUB

PYTHON APPLICATION DEVELOPER | IT & TECHNICAL SUPPORT

+63 910 688 8122 | dionelle.alinsub86@gmail.com | Philippines

PROFESSIONAL PROFILE

Self-directed Python application developer with hands-on experience building desktop and web-based business applications using Python, Flask, Tkinter, SQLite, HTML, CSS, and JavaScript. Also experienced in practical IT support, PC troubleshooting, LAN setup, CCTV installation and upgrades, DVR configuration, and remote surveillance access. Has developed independent projects involving management workflows, records, matching logic, and financial computations. Seeking junior Python developer, application support, or IT support opportunities.

CORE SKILLS

Programming & Web: Python, Flask, HTML, CSS, JavaScript

Desktop & Database: Tkinter, SQLite, database design, CRUD operations

IT Support: PC hardware/software troubleshooting, computer maintenance, LAN/network setup

CCTV & Surveillance: Hikvision, Dahua, CCTV installation/upgrades, camera replacement, cabling, DVR configuration, remote access

Business Applications: Workflow logic, records management, matching operations, financial computations

PROFESSIONAL EXPERIENCE

IT & Technical Support / CCTV Technician / Social Media Manager | Banaybanay Cockpit Arena | 2023–Present

Provide on-site technical support during arena operations, troubleshooting computer hardware and software issues.

Install, replace, upgrade, and maintain CCTV cameras, cabling, and DVR systems.

Configure and troubleshoot Hikvision and Dahua DVR systems and remote CCTV access.

Support reliable operation of computers, networks, and surveillance equipment.

Manage Facebook page content and event announcements as an additional responsibility.

Area Manager – Davao Area | Cosmetigroup Int'l Corp. | 2010–2013

Supervised operations across Abreeza Mall, SM Lanang, and SM Ecoland branches.

Coordinated a team of approximately 12 personnel and handled branch administrative requirements.

Respiratory Technician | Care4One Enterprise | March–July 2007

Received company training in medical ventilator setup and operation, including setup, weaning procedures, airway suctioning, and recognizing machine errors.

SELECTED PROJECTS

Machine Betting System | Independent Project |

Built a Python controller/server application with a browser-based teller workflow and centralized SQLite database.

Implemented fight management, bet recording, odds handling, teller sessions, and payout calculations.

M.D. Smart Barangay Management System | Independent Project |

Developed a Flask-based management application with resident and household records, document workflows, and local-first data storage.

M.D. Matching System 2.0 | Independent Project |

Developed a Python desktop application with matching logic and supporting interface components.

M.D. Cash Counting System | Independent Project |

Created a Tkinter-based application for cash counting and balance computation.
